PROPERTY OVERVIEW

Property: Aparna Dharani
Property Type: Villa
Developer: Aparna

Location

Hyderabad, Telangana, India

PROPERTY DETAILS

Area: 2,000
Area Unit: sqft

VALUATION

Quoted Price: INR 3.00 Cr
Estimated Fair Value: INR 56.00 L
Price Position: 435.71% Above Fair Value

ASSESSMENTS

Inventory Assessment: Not Performed

Developer Assessment: Not Performed

SCORE BREAKDOWN

Valuation Analysis: 50.00

Inventory Risk: 0.00

Developer Quality: 0.00

Scores range from 0-100. Higher scores indicate lower buyer risk.

90-100 Excellent | 80-89 Strong | 70-79 Fair | 60-69 Caution | Below 60 High Risk

GOVERNMENT INTELLIGENCE

Government Guidance Rate: ₹4,500 / sqft

Estimated Government Value: INR 90.00 L

Government Source: Government Guideline Value

Data Confidence: HIGH

The quoted price should be compared against the government guidance value for registration purposes. Government guidance values are not market values.

Government guidance values are primarily used for taxation and property registration and may differ from prevailing market prices.

HOW PROPERTYIQ WORKS

Buyer Protection Score

Valuation Analysis

Inventory Assessment (when available)

Developer Assessment (when available)

Valuation receives the highest weight because purchase price has the largest direct impact on buyer outcomes.

Inventory risk influences future appreciation potential and resale liquidity.
Developer quality evaluates delivery history, execution capability, and regulatory compliance.

PropertyIQ automatically adjusts the Buyer Protection Score using all available assessment models. When inventory or developer information is unavailable, the score is calculated using the remaining available evidence.

KEY FINDINGS

- Property is 435.71% above fair value.
- Property appears materially overpriced.
- Inventory assessment was not performed because project inventory data was not provided.
- Developer assessment was not performed because developer performance information was not provided.

NEGOTIATION ADVISOR

Strong Buyer Position

Property is priced above estimated fair value, creating favorable negotiation leverage for buyers.

Target Purchase Price
INR 56.00 L

Recommended Negotiation Range
INR 53.20 L - INR 57.12 L

Estimated Buyer Savings
INR 2.44 Cr

Buyer Advantage Meter
60 / 100
MODERATE BUYER ADVANTAGE

Some buyer leverage exists, though market conditions remain relatively balanced.

Recommendation Confidence

50 / 100

VERY LOW

Available evidence is limited or inconsistent. Exercise additional caution.

05 COMMON REAL ESTATE FRAUD PATTERNS IN INDIA

Drawn from RERA orders, ED typologies & media/court reporting – generic, not scored per state

These are the patterns that recur across Indian real estate markets, per RERA adjudication orders and enforcement reporting. As with Section 4, no credible public dataset scores each of these per state, so they're presented as a reference list rather than a colored grid.

- 01 **Revenue record manipulation**

Tampering with mutation entries (patta / khata / 7-12 extract / jamabandi) to alter who the land records show as owner.
- 02 **Forged sale deeds & power of attorney**

Fabricated or backdated deeds and GPA documents used to claim or transfer ownership without the real owner's consent.
- 03 **Multiple sale of the same unit**

A single flat or plot sold to more than one buyer — a recurring complaint category in RERA filings against under-construction projects.
- 04 **Government / gram panchayat land encroachment**

Private sale or development of land that actually belongs to the state, forest, or a local body.
- 05 **Illegal layouts & unauthorised colonies**

Plots sold in layouts that were never approved by the local development authority, common on urban peripheries.
- 06 **Benami / nominee ownership**

Property held in someone else's name to conceal the real, beneficial owner — the specific target of the Benami Act above.
- 07 **Builder fund diversion**

Buyer deposits or project-linked loans redirected to other projects or personal use, a central issue in RERA's escrow-account rule.
- 08 **Agricultural land conversion fraud**

Selling agricultural land for residential/commercial use before the required land-use conversion has actually been approved.
- 09 **Fake NOCs & approvals**

Forged no-objection certificates, occupancy certificates, or environmental/CRZ clearances presented to buyers as genuine.
- 10 **Title disputes from unclear inheritance**

Sales proceeding despite unresolved succession claims among legal heirs, common with older, undivided family land.

06 BUYER SAFEGUARDS

General due-diligence practice, not state-specific data

- ✓ Verify the title chain as far back as records allow, ideally 30 years.

✓ Confirm the land isn't government, forest, or under litigation.

✓ Validate layout/building approvals with the local development authority.

✓ Ask for the encumbrance certificate covering the full ownership period.
- ✓ Cross-check revenue records (mutation entries) against a physical survey.

✓ Check the project's RERA registration number on the state RERA portal directly.

✓ Confirm any power of attorney is current, registered, and not revoked.

✓ Use independent legal vetting, not just the lender's or builder's paperwork.

GLOBAL FRAUD TAXONOMY HEAT MAP

04 GLOBAL FRAUD TAXONOMY — HOW REAL ESTATE IS ACTUALLY ABUSED

Generic typology, per FATF 2007 & 2022 real estate reports — deliberately not scored per country

Unlike the country matrix above, these categories are **not** given a per-country severity rating here, because no public dataset breaks real estate fraud down this granularly by country. FATF's own reports describe these as universal vulnerabilities of the sector, present to varying degrees everywhere it operates.

- 01

Cash purchases & complex financing
Buying property outright with cash, or through layered loans and credit structures that obscure the true source of funds.
- 02

Shell & nominee ownership
Holding title through companies, trusts, or nominees so the real beneficial owner is never recorded on any public register.
- 03

Under- or over-valuation
Manipulating the declared sale price — under-valuing to dodge tax, over-valuing to move extra money through the transaction.
- 04

Title & document fraud
Forged deeds, powers of attorney, or backdated agreements used to fabricate or transfer ownership unlawfully.
- 05

Wire & closing fraud
Interception of email or wire instructions during closing to redirect a buyer's deposit or final payment to criminals.
- 06

Multiple sale / double-selling
The same unit or plot sold to more than one buyer, common in off-plan and pre-construction markets with weak escrow controls.
- 07

Developer / project fund diversion
Buyer deposits or construction financing diverted away from the project they were raised for, leaving it stalled or abandoned.
- 08

Professional collusion
Agents, brokers, valuers or lawyers knowingly facilitating a transaction they know or suspect involves illicit funds.
- 09

Cross-border layering
Routing purchase funds through multiple jurisdictions and intermediary entities before they reach the property market.
- 10

Online listing & rental scams
Fake listings, phishing, or advance-fee scams targeting buyers and renters directly, a fast-growing cyber-enabled category.
