HOW PROPERTYIQ WORKS

Buyer Protection Score

Valuation Analysis

Inventory Assessment (when available)

Developer Assessment (when available)

Valuation receives the highest weight because purchase price has the largest direct impact on buyer outcomes.

Inventory risk influences future appreciation potential and resale liquidity.

Developer quality evaluates delivery history, execution capability, and regulatory compliance.

PropertyIQ automatically adjusts the Buyer Protection Score using all available assessment models. When inventory or developer information is unavailable, the score is calculated using the remaining available evidence.

KEY FINDINGS

- Property is 102.02% above fair value.

- Property appears materially overpriced.
- Inventory assessment was not performed because project inventory data was not provided.
- Developer assessment was not performed because developer performance information was not provided.

NEGOTIATION ADVISOR
